

WeatherCloud

Road Weather Intelligence

WeatherCloud is **Road Weather Intelligence**

How Does WeatherCloud Work?

WeatherCloud attaches sensors to vehicles,
transforming them into
mobile road weather reporting platforms

Where is WeatherCloud's Sweet Spot?

Where weather data has the greatest impact on transportation

WeatherCloud-Equipped Vehicles Report:

- 
- Precipitation type/rate
 - Visibility
 - Pavement temperature
 - Ambient temperature
 - Humidity
 - Pavement condition: potholes and frost heaves
 - Pavement condition: wet/icy/snowpacked
 - Traction: COF of tires

Data for Smart, Efficient DOT Operations

- Traffic and road weather analysis for operations and maintenance
- Hazard hotspot identification
- Pot hole, frost heave and broken pavement identification/location
- Public safety warnings

1 RWIS = 250 WeatherCloud Vehicles

WeatherCloud

We know where the rubber
meets the road
