Dynamic Mobility Applications Program

Advancing to Deployment, 2010-2015

- Identified and Prioritized 100+ Candidate Mobility Applications
- Identify 33 High Value Applications
- Developed Application Bundle ConOps (6)
- Developed Bundle System Requirements and Test Readiness Plans (6)
- Preparing 6 Bundle Prototype Demonstrations and Field Tests
- Initiated Application Prototyping in 6 Bundles
- Open Source/Open Data
- Assess Potential Impact of App implementation
- Applications Transition into CV Pilot Deployments
- Developed 6 Candidate Mobility App Bundles
- Concept of Operations
- Requirements Analysis
- Prototype Development
- Prototype Demonstrations
- Transition to Deployment
- Application Identification
- Research
- Deployment
DMA Prototype Development and Testing

In addition…
- Analytics Test Bed
- Program Evaluation
